Erdős, Paul
Some old and new problems in combinatorial geometry. (In English)
Convexity and graph theory, Proc. Conf., Israel 1981, Ann. Discrete Math. 20, 129-136 (1984).

[For the entire collection see Zbl 549.00001.]
As the title suggests, this is further in the well-known series of the author's papers concerning the discovery problems in combinatorial geometry. In this paper the problems are divided into five sections according to their nature and an extensive up-to-date list of references is included.
