Erdős, Paul

Welcoming address. (In English)

Random graphs '83, Lect. 1st Semin., Poznań/Pol. 1983, Ann. Discrete Math. 28, 1-5 (1985).

The author, better the speaker, gives a few historical reminiscences on how he came to apply probability methods in combinatorial analysis. Half of the address is concerned with Ramsey number while in the second half he mentions a few other examples only briefly.

H.Kröger

Classification:

05-02 Research monographs (combinatorics)

05A15 Combinatorial enumeration problems

05C55 Generalized Ramsey theory

Keywords:

historical reminiscences; Ramsey number
