# Contents

*E. Abedi, Z. Nazari*

**On submersion and immersion submanifolds of a quaternionic projective space ..... 5**

*K. N. Boyadzhiev*

**Lah numbers, Laguerre polynomials of order negative one, and the nth derivative of  $\exp(1/x)$  ..... 22**

*S. Dey, B. Pal, A. Bhattacharyya*

**On some classes of mixed-super quasi-Einstein manifolds .....32**

*S. Dirik, M. Ateken*

**Pseudo-slant submanifolds in cosymplectic space forms .....53**

*S. S. Dragomir*

**Some vector inequalities for two operators in Hilbert spaces with applications ..... 75**

*F. Qi, B.-N. Guo*

**Logarithmically complete monotonicity of a function related to the Catalan-Qi function .....93**

*J. Pearić, A. Perušić Pribanić, K. Smoljak Kalamir*

**Generalizations of Steffensen’s inequality via some Euler-type identities ..... 103**

*A. Rabhi, L. Keddani, Y. Hammou*

**Consistency rates and asymptotic normality of the high risk conditional for functional data .....127**

*M. Remili, L. D. Oudjedi*  
**Stability of the solutions of nonlinear third order differential equations with multiple deviating arguments .....150**

*H. Rezapour, Gh. Shirdel*  
**The time-varying shortest path problem with fuzzy transit costs and speedup ..... 166**

*G. S. Saluja, B. P. Tripathi*  
**Some common random fixed point theorems for contractive type conditions in cone random metric spaces ..... 174**
