## GOOD $\ell_2$ -SUBSPACES OF $L_p$ , $p > 2$

DALE E. ALSPACH

Communicated by K. Jarosz

ABSTRACT. We give an alternate proof of the result due to Haydon, Odell and Schlumprecht that subspaces of  $L_p$ ,  $p > 2$ , which are isomorphic to  $\ell_2$  contain subspaces which are well isomorphic to  $\ell_2$  and well complemented.
