COMPOSITION OPERATORS FROM NEVANLINNA TYPE SPACES TO BLOCH TYPE SPACES

AJAY K. SHARMA¹ AND SEI-ICHIRO UEKI^{2*}

Communicated by M. S. Moslehian

ABSTRACT. Let X and Y be complete metric spaces of analytic functions over the unit disk in the complex plane. A linear operator $T : X \rightarrow Y$ is a bounded operator with respect to metric balls if T takes every metric ball in X into a metric ball in Y . We also say that T is metrically compact if it takes every metric ball in X into a relatively compact subset in Y . In this paper we will consider these properties for composition operators from Nevanlinna type spaces to Bloch type spaces.
