Information for Authors

EJMAPS welcomes both review papers and original work. Submission of articles is understood to imply that the article is original and is not being considered for publication elsewhere. Letters to the Editor (in the form of short notes, communications, comments, data bank), book reviews, and meeting/course announcements are also welcomed.

Scope

EJMAPS publishes research related to the application of mathematical and physically related sciences. This includes but is not limited to:

- Fundamental Bayesian theory
- Applied Bayesian Analysis
- Statistical Mechanics Simulations
- Quantum Monte Carlo
- Molecular Modeling
- Mathematical Modeling
- Chemical Statistics
- Symbolic/Numerical Computation
- Thermochemistry
- Ab Initio and Density Functional Theory: Theoretical and Computational Developments
- Ab Initio and Density Functional Theory: Properties, Dynamics, and Electronic Structure of Condensed Systems and Clusters
- Ab Initio and Density Functional Theory:: Properties, Dynamics, and Electronic Structure of Atoms and Molecules
- Ab Initio and Density Functional Theory: Theoretical Biochemistry and Biophysics
- Laser Spectroscopy: Kinetics
- Laser Spectroscopy: Fundamental Physical Properties
- Organic/Inorganic Characterization and Synthesis: Fundamental Physical Perspective
- Polymer Physics
- Plasma Physics
- General Scientific Perspectives
- Education Research in Mathematics and Sciences

High quality, original reports of significance in these areas are invited. We are determined to encourage scientists and mathematicians to publish their theoretical and experimental details in as much detail as possible. Due to the open-ended nature of this journal, articles must be explained in as much details as needed to communicate the novelty of the proposed work.

Submission of manuscripts

Authors are requested to send either three good copies of their work or via e-mail to one of the three chief editors (or to a member of the board whose specialty matches that of the submitted work):

Mathematical Sciences
Saber Elaydi
Department of Mathematics
Trinity University
San Antonio, TX 78212
E-mail: Selaydi@ejmaps.org
Tel: 210-999-8246
Fax: 210-999-8264

Physical/Chemical Sciences
Abraham F. Jalbout
University of New Orleans
Department of Chemistry
New Orleans, LA 7014 USA
E-mail: Ajalbout@ejmaps.org
Tel: 504-816-4726
Fax: 504-835-1612

Biological Sciences
Bassel E. Sawaya
Temple University
Center for Neuro-Virology
Philadelphia, PA. 19122, USA
E-mail: Sawaya@ejmaps.org
Tel: 215-204 0607
Fax: 215-204 0789

Language
Use good, explicit English. Consult a native speaker and/or dictionary where necessary.

Manuscript Preparation
The manuscript should be double spaced with wide margins. In general, each manuscript needs to contain (in the following order) a Title, author, affiliations (and addresses), abstract, keywords, PACS, AMS classifications, and the numbering should be consecutive. Full details are available online at www.ejmaps.org/guide.htm. A template is available at www.ejmaps.org/template.htm, however authors are encouraged to consult the most recently published articles (for either MS WORD files or TEX files) for more detailed guidelines.

Communication
The full postal address, fax, and telephone numbers, as well as e-mail addresses of the corresponding author(s) must be provided on the first (title) page of the manuscript.

Electronic scripts
In case the file size exceeds a reasonable amount, authors are encouraged to send an electronic file on disk to the editor handling the manuscript. If the author submits the paper via airmail, than the electronic file will only be requested after the acceptance of the paper.

Color
Since publication will commence electronically, there are no additional charges for color reproduction.

Referees
Every paper is subject to peer review. The author can suggest a list of three-five potential referees in the review process. All details of phone, address, fax, etc must be provided, however, the editors will not necessarily approach them.

Reprints
Reprint may be ordered online at www.ejmaps.org/forms.htm

This journal and all contributions are protected by copyright to the EJMAPS organization, and the following terms must be applied.

Photocopying
National copyright laws allow single photocopies of articles for personal use(s). Permission from the publisher is required for all other photocopying, including multiple or systematic copying, copying for advertising, or promotional purposes, resale and all forms of document delivery. This must be requested in writing, with full details to: EJMAPS Organization, 1107 Carrollton Ave, Metairie, LA 70005.

Derivative Works
Reproduction of the articles or abstracts for internal circulation within their institutions is allowed, however permission is required from the publisher for use of articles in compilations and/or translations.

Electronic Storage or Usage
Permission is granted to individuals or non-profit organizations to store the articles electronically, as long as proper referencing to the source is provided.

Contents

SEMINAR SERIES 1

Bayesian Economic Cost Plans I. Comparison to Classical Plans
Fouad N. Jalbout, Abraham F. Jalbout, Hadi Y. Alkahby……...……1-8

Bayesian Economic Cost Plans II. The Average Outgoing Quality
Abraham F. Jalbout, Hadi Y. Alkahby, Fouad N. Jalbout, Abdalla M. Darwish……..….9-15

Bayesian Economic Cost Plans III. The Lot Mean Relative to a Quality Characteristic
Abraham F. Jalbout, Hadi Y. Alkahby, Fouad N. Jalbout, Abdalla M. Darwish…….16-24

SEMINAR SERIES 2

Thermodynamics of biological evolution and aging: Supramolecular thermodynamics is a key to understanding phenomena of life. What is life from a physical chemist's viewpoint
Georgi P. Gladyshev ……..……..1-15
