Nachdiplomvorlesung

Tsachik Gelander (The Hebrew University, Jerusalem)

Lattices in Lie and Locally Compact Groups

September 28 - December 21, 2011

Wednesdays 10.15 - 12.00h

HG G 43

ETH Zürich, Sälimstrasse 101

Abstract

This advanced graduate course will focus on the theory of lattices in locally compact groups including both the classical theory that has been developed mainly during the 60's and the 70's of the previous century as well as recent and present progress.
